

## Senior Structural Engineer

### Desired attributes:

- Chartered or near Chartered level (working towards CEng MStructE / MICE).
- Ability to drive and undertake site visits and site inspections (Full UK License).
- Ability to work with others including senior and junior members of staff to deliver projects and mentor staff where required.
- Good communication skills, comfortable with working with other disciplines and other members of the design team and working collaboratively on projects.
- Ability to scheme, sketch, present and communicate ideas and thoughts to other members of the team.
- Comfortable attending meetings, both physically and virtually, providing project and design updates and then communicating outcomes to the wider design team.
- Commercial awareness to deliver projects on time and budget.

### Desired experience:

- Design experience commensurate to that of a Senior Engineer working within a structural engineering or multi-disciplinary design team.
- Experience working in a team with senior and more junior members of staff is essential.
- Experience working on a variety of projects from small extensions to larger steel and concrete frame structures, inclusive of residential, commercial education and industrial projects.
- Experience scheming and designing projects utilising timber, masonry, concrete and steelwork forms of superstructure construction, including concrete flat slab frames, composite steel frames, steel portal frame structures, basements, transfer slab/timber frames.
- Experience in scheming and designing and managing projects with piled foundations, basements, offset foundations, deep tree influenced foundations etc.
- Desired experience working on projects that have been delivered through to construction and completion. Ability to answer site queries and develop ideas and solutions as required.
- Experience working within a team, updating line managers on project progress and delivery as well as mentoring junior members of the design team and CAD technicians.
- Experience managing the resources and time of more junior members of staff, delegating tasks and monitoring project and design progress of numerous projects simultaneously, to ensure Client deadlines are achieved
- Familiar with contracts and managing projects through traditional and design and build contracts.

### About us:

- Medium sized Civil and Structural Engineering practice with a family ethos.
- You will benefit from working within an experienced team on all projects.
- Our clients and orders are ever increasing with a particular focus on medium and large scale projects.
- Professional development is at the core of our business as an ICE approved employer. With our experienced SCE, DE and Professional Reviewer we are well positioned to support your professional development.
- Flexible working 2 days at home and 3 days in the office.
- Considine is currently trialling a nine-day fortnight which you would be entitled to through the trial and if it becomes permanent.
