

TECHNICAL DIRECTOR – CIVIL ENGINEERING

The Role

We are looking for an experienced Civil Engineer to work within our management team to deliver civil engineering designs for a range of sectors, including residential, schools, commercial and industrial.

You will be assisting the Director to lead the civil engineering department with both the detailed and strategy design for the following:

- Roads / Highways
- Private external works / pavement design
- Foul Drainage
- Surface Water Drainage & SuDS
- Flood Risk Assessments & Drainage Strategies

What are we looking for?

As a guide, we are seeking the following qualifications, skills and attributes for this opportunity:

- A Civil Engineering degree, or equivalent
- Chartered, or near chartered, with ICE, CIWEM or CIHT
- Experience and ability with the aforementioned design elements
- Ability to consider scheme fundamentals and develop outline designs prior to overseeing detailed design
- Ability to demonstrate technical leadership
- Have a good understanding of the UK construction market
- Have good knowledge of health and safety relating to designs, inclusive of CDM, and ability to support team members accordingly
- Have a firm understanding of design standards and ability to lead the continual development of deliverables to meet with relevant standards
- Experience and ability managing resources on a day to day basis
- Experience and success with project bids
- Experience and ability monitoring and managing financial aspects of projects
- Experience and ability reviewing and approving work of engineers and technicians
- Experience mentoring more junior staff

What we offer

- A flexible working environment
- Salary of between £60-80k, dependant on experience and qualifications
- One paid professional membership
- 25 days annual holiday, plus bank holidays, plus birthday leave
- Currently trialling a 9-day fortnight which you will be eligible for during the trial and should it continue.
